

### HardTape<sup>®</sup> External USB & FireWire or SATA Bay

The perfect accessory to fully integrate HardTape/MediaPac/SolidTape into your workflow. The external SATA bay allows you access to the 50+MB/s transfer rates of the latest HardTape cartridges. The USB 2.0/FireWire 400 combo bay is great for attachment to computers, NLE's, DVR/PVR's, and other devices with inconvenient rear panel connectors. Both bays provide "hot-swap" capability with fast data transfer rates that allow editing directly to/from the cartridge and can be mounted horizontally or vertically to fit any workspace.
