QUICK START GUIDE

MEDIAPAC CARTRIDGE
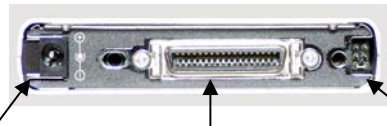

Your MediaPac Cartridge requires a MediaPac Cable or Bay Interface Kit to operate.

5VDC   Data / Power   Master/Slave

- The Interface cable carries both data and power.
- Connection of the 5VDC jack is not usually required when using the Interface cable.
- The master/slave jumper block is set correctly for cable and bay uses and will not need to be adjusted.
- Refer to your Interface Kit Quick Start Guide for connection, installation and operating instructions.

Option 1 MediaPac Bay Interface Kits

USB 2.0

PATA / IDE

SCSI

50-Pin Narrow
68-Pin Wide

Option 2 USB Interface Kit

Option 3 FireWire Interface Kit
